HEADLINE

Your Business. Structured Properly.

SUBHEADLINE

Incorvia is a strategic advisory firm that helps founders and investors design the right UAE business structure — before a single document is filed.

REFRAME SECTION

Most businesses in Dubai get set up fast. Not all of them get set up right.

There's a difference between obtaining a license and structuring a business. The wrong jurisdiction, the wrong activity, the wrong ownership model — these aren't minor errors. They create banking complications, compliance exposure, and restructuring costs that surface months later, often at the worst time.

At Incorvia, we advise first. We structure second. We execute third. That sequence is not incidental — it is the entire point.

WHAT MAKES INCORVIA DIFFERENT — 3 COLUMN FEATURE BLOCK

- **Advisory Before Execution** — We don't start with paperwork. We start with a conversation about your business model, risk exposure, and long-term goals. The structure follows the thinking.
- **Fewer Wrong Decisions** — Our value is not in how fast we file — it's in how many costly mistakes you avoid. Every recommendation is intentional, defensible, and built for longevity.
- **Founder-Aligned, Always** — We qualify clients before committing. We don't chase volume. We protect the integrity of every engagement so you get the attention your business deserves.

SERVICES OVERVIEW

- Business Structuring & Company Formation
- Licensing Strategy (Mainland, Free Zone, Offshore)
- PRO Services & Government Liaison
- Visa & Immigration Processing
- Corporate Compliance & Amendments
- Banking Readiness & Account Support
- Ongoing Strategic Advisory

HOW IT WORKS — TEASER

We follow a structured process — because good outcomes begin with good thinking.

Initial Enquiry → Discovery Call → Structuring & Advisory → Execution → Ongoing Support

→ See the Full Process

POSITIONING STATEMENT

Incorvia advises founders first, structures businesses second, and executes compliantly — so growth doesn't come with hidden risks.

BUSINESS WITH PURPOSE

At Incorvia, doing good business and doing good in the world are not separate things.

- **We plant a tree for every company we incorporate.** — Every new business structure we build contributes to a greener future — because growth should leave something behind beyond a trade license.
- **We give 5% of our net profits to charity.** — A portion of what we earn goes directly toward causes that matter. Because a business that prospers has a responsibility to the community it operates in.

These are not marketing promises. They are commitments built into how Incorvia operates.

Not sure what structure your business needs? That's exactly where we start.

PAGE HEADLINE

We Think Before We Execute.

Incorvia was built for founders who want clarity, not just compliance.

Our Story

The UAE business setup market is crowded. Most firms compete on price, speed, and packages. They're efficient — but they're not strategic. And in a market where the wrong structure can cost you banking access, invite regulatory scrutiny, or force an expensive restructuring eighteen months later, efficiency without thinking is its own kind of risk.

Incorvia was founded to serve a different kind of client — one who isn't just looking to tick boxes, but to build something that lasts. We don't sell setups. We sell clarity. The setup is the consequence.

Our Philosophy

Every engagement at Incorvia begins with a discovery process — not a quotation. We go deep into your business model, ownership structure, future plans, and risk exposure before recommending anything. This is not bureaucracy. It's the work that protects you.

Premium advisory means controlling the thinking before executing the process. That discipline is what separates a well-structured business from one that looks right on paper but breaks under pressure.

What We Stand For

- **Integrity** — We tell you what your business needs, not what is easiest to sell.
- **Precision** — Every recommendation is deliberate and defensible.
- **Clarity** — No jargon. No ambiguity. No rushed decisions.
- **Long-Term Thinking** — We optimise for where your business is going, not just where it is today.

About Our Founder

Aman Khan is the Founder of **Incorvia Corporate Advisory** — a firm built on the belief that the right business structure is not an administrative outcome, but a strategic one.

Aman's career began in civil engineering, with five years of hands-on experience in high-rise construction projects. That foundation — built on precision, problem-solving, and structured thinking — carried directly into his transition into business consulting and UAE regulatory advisory. The discipline of getting the details right

before breaking ground translates, almost perfectly, to getting a business structure right before incorporation.

Over the years, Aman has worked with clients across a wide range of industries — real estate, dental clinics, restaurants, IT companies, and travel agencies — developing a track record grounded in navigating the UAE's regulatory landscape with accuracy and care.

What distinguishes Aman's approach is not just knowledge of the process — it is his insistence on understanding the business behind the application. His client-centric philosophy, built on trust and transparency, has earned him a network of loyal clients and consistent referrals who return not because the paperwork was fast, but because the advice was right.

Through Incorvia, Aman continues to create impact by providing personalised advisory and actionable structuring solutions — making the UAE's business environment not just accessible, but navigable with confidence.

Who We Work With

Incorvia works with:

- Entrepreneurs launching their first venture in the UAE
- SMEs looking to restructure, expand, or scale operations
- International investors entering the Dubai market
- Freelancers and solopreneurs seeking the right license and visa model

We are selective about who we take on — because the quality of our work depends on the depth of our involvement.

If you want a firm that thinks before it acts — and acts only when the thinking is right —

→ Let's Talk

Everything Your Business Needs. Structured Properly.

We don't offer packages. We design engagements based on what your business actually needs.

Business Structuring & Company Formation

Before selecting a license, we assess your business model, activities, ownership goals, banking requirements, and growth trajectory. Only then do we recommend the right structure — mainland, free zone, or offshore — with the right activity codes, legal form, and compliance baseline.

The right structure today prevents the wrong conversation in 18 months.

Licensing Strategy — Mainland, Free Zone & Offshore

Each jurisdiction in the UAE carries different implications for trading, banking, ownership, and compliance. We align your license with your operational reality — not just your budget.

INCLUDES

- Jurisdiction evaluation & activity selection
- Ownership structuring
- DED / Free Zone / Offshore applications

PRO Services & Government Liaison

Government touchpoints in the UAE are numerous and non-negotiable. Our PRO team manages every interaction with accuracy and professionalism.

INCLUDES

- Document processing & attestation
- Ministry filings
- Trade license renewals
- Regulatory coordination & authority approvals

Visa & Immigration

We manage the end-to-end visa process for investors, employees, and dependents — ensuring full compliance with UAE immigration authority requirements at every stage.

INCLUDES

- Investor & partner visas
- Employment visas
- Dependent & family visas
- Renewals & cancellations

Corporate Compliance & Amendments

Business structures evolve. We manage the amendments, renewals, and compliance obligations that keep your business in good standing — without disrupting your operations.

INCLUDES

- Shareholder changes
- Activity amendments
- Annual renewals & compliance monitoring
- Corporate governance support

Banking Readiness & Account Support

Corporate banking in the UAE requires proper documentation, the right business profile, and an understanding of what banks assess. We prepare your file and connect you with appropriate banking partners.

INCLUDES

- Banking document preparation & profile alignment
- Bank introductions & facilitation

Ongoing Strategic Advisory

As your business scales, your advisory needs evolve. We remain engaged as a trusted partner for compliance decisions, structural adjustments, and strategic questions.

INCLUDES

- Strategic reviews & expansion advisory
- Compliance guidance
- Structural optimisation as you scale

Every engagement starts with a conversation — not a quote.

A Process Built Around Thinking First.

We follow a structured advisory process because the quality of the outcome depends on the quality of the thinking that precedes it.

Step 1 — Initial Enquiry

Your journey begins with a simple enquiry. We review your objective at a high level to understand whether Incorvia is the right fit for your needs. We are selective — and that selectivity protects the integrity of every engagement we take on.

Step 2 — Discovery Call

A focused advisory conversation with a senior consultant. We discuss your goals, background, jurisdictional needs, timelines, and constraints — without selling or pitching. This is a genuine assessment.

Step 3 — Understanding Your Requirements

We go deeper into your business model, ownership structure, future plans, and risk exposure. This stage surfaces compliance, banking, and scalability considerations that most clients would otherwise encounter too late.

Step 4 — Advisory & Structuring

Based on the discovery, we design the right structure — not a standard package. This includes licensing strategy, jurisdiction and activity alignment, compliance and risk considerations, and banking and operational readiness. Every recommendation is intentional and defensible.

Step 5 — Advisory Sign-Off & Clarity

Before execution begins, you receive a clear roadmap: what will be done, why it is being done, and what the timelines, costs, and next steps look like. No ambiguity. No rushed decisions.

Step 6 — Execution & Processing

With the thinking done correctly, execution becomes smooth. We handle licensing, documentation, regulatory coordination, follow-ups, and approvals end-to-end.

Step 7 — Ongoing Support

As your business evolves, we remain available for compliance support, amendments, expansions, and strategic advisory. This is an optional but recommended layer — because businesses that are well-advised early scale without the costly surprises.

Ready to start with a conversation that's actually useful?
